1. OSS FILE COMMISSIONING (FC)

1.1 Overview

The OSS File Commissioning module follows the same conceptual framework as the Land File Commissioning but is strictly dedicated to Occupancy Permit (OP) Change of Name transactions. This module streamlines the process of converting existing OPs into commissioned files for ownership transfer processing.

Commission New File Number

Capture Occupancy Permit First

Please select **Direct Allocation** or **Resettlement** above, then capture/select an Occupancy Permit (OP) record to continue with the commissioning process.

Figure 1: Overview of the OSS File Commissioning Interface

1.2 Key Features

A. Single OP Capture

- Individual OP entry for one-to-one file commissioning
- File options manually entered or auto-populated from OP data
- Location details automatically backfilled from the OP details captured
- Immediate generation of FileNo and TrackingID

Occupancy Permit (OP)

Are you capturing a **single** OP, or a **batch** of OPs for OP Direct Allocation?

Figure 2: OP Capture prompt

Figure 3: The Single OP capture interface

B. Batch OP Capture

- Bulk entry of multiple OPs for simultaneous file commissioning
- Follows the same batch mode process as Land File Commissioning
- Efficient for processing multiple change of name applications from the same development or allocation list
- System validates each OP before batch processing

Figure 4: The Batch OP Capture Prompt

C. Automatic Data Backfilling

When OP details are entered, the system automatically populates:

- File Name/Applicant: From OP Party 2 details
- Location Details: Plot Number, District, LGA from OP records
- Land Use: Based on OP classification (RES, COM, IND, AG, etc.)
- Customer Type: Individual/Corporate from OP data

Figure 7: The OP File Commissioning Backfill

D. Batch Job Management Table

A dedicated interface that manages all files commissioned through batch operations:

Features:

- Batch Grouping: All OPs involved in a batch job are grouped under a unique Batch ID
- Individual Tracking: Each OP within the batch can be tracked separately
- Status Monitoring: Real-time status updates for each file in the batch
- Bulk Actions: Ability to perform actions on multiple files simultaneously
- Progress Indicators: Visual indicators showing completion status of each OP in the batch

2. FETCH EXISTING FILE RECORD (FEFR)

2.1 Overview

The FEFR module is specifically designed to handle legacy files that were commissioned before KLAES implementation (pre-2026). These files exist in the system as OPs or physical records but were not created through the KLAES File Commissioning workflow. FEFR bridges the gap between legacy records and the modern KLAES ecosystem.

S/N	CUSTOMER TYPE	SOURCE	M/S FILE NO	FILE TITLE	LAND USE	TP NO	PLOT NO	USA	Loca
1	Individual	NEW Record → 1 OP → 1 File	REG-2824-2524 TEMP-000115	ABBA SHITU SHARUBUTU	RESIDENTIAL	TP/KNUPDA/2778	300	UNGOGG	PLOT 2
2	Individual	NEW Record → 1 OP → 1 File	REG-2817-3406 TEMP-000111	HABBU ALI	RESIDENTIAL	TP/KAS/2118	902A	GWAJE	PLOT 9
3	Individual	NEW Record → 1 OP → 1 File	REG-2828-2675 TEMP-000100	USANA BEKU IARNA	RESIDENTIAL	TP/K/338E	1029	KUMBOTSO	PLOT 1
4	Individual	NEW Record → 1 OP → 1 File	REG-2828-2674 TEMP-000107	USANA BEKU IARNA	RESIDENTIAL	TP/K/338E	1031	KUMBOTSO	PLOT 1

Figure 16: The FEFR Table

2.2 Purpose

- Link existing OPs to new KLAES FileNos
- Handle Change of Name/Ownership transactions for pre-2026 files
- Establish proper file lineage and tracking for legacy records
- Enable digital processing of historical land transactions

FETCH EXISTING FILE RECORD

FEFR

Select source file number, detect OP record in PRA, then continue with New or Existing flow.

SOURCE FILE NUMBER

Select file number

Awaiting file selection.

OP RECORD

No OP record loaded yet.

Figure 17: The Fetch Existing File Record default interface

2.3 OP-to-File Linkage Scenarios

The FEFR interface handles four critical linkage scenarios that are essential for accurate Change of Name/Ownership processing:

Scenario 1: OP Subdivision

Mapping: 1 OP → 2 Different Files

Transfer of Titles: 1 OP generates 2 ToTs (Transfer of Titles)

Use Case:

When a single Occupancy Permit is subdivided into multiple parcels, each requiring its own file for individual ownership transfer.

Scenario 2: OP Merger

Mapping: 2 OPs → 1 File

Transfer of Titles: 2 OPs consolidated into 1 ToT

Use Case:

When multiple adjacent OPs are merged into a single property file for unified ownership or development.

The screenshot displays the 'FETCH EXISTING FILE RECORD' (FEFR) interface. It includes a search bar for 'SOURCE FILE NUMBER' with the value 'COM-2014-669' and a 'Select' button. Below the search bar, a message states: '2 OPs found but not yet matched to a Transfer of Title. Click the button to link.' A dropdown menu shows 'UMAR NAMADI INUWA' and 'PLOT C-26B, KUDIDDIFAWA WESTERN BY PASS, KUMBOTSO'. A prominent purple button labeled 'Join 2 OPs & Match' is visible. On the right, the 'OP RECORD' section shows '2 RECORDS DETECTED'. It lists two records: 1. OP Serial No 22, Party 2 ABBA AND SUNUSI MUSTAPHA, Property PLOT C-26B, KUDIDDIFAWA WESTERN BY PASS, KUMBOTSO. 2. OP Serial No 21, Party 2 ABDULLAHI ADAMU MUHAMMAD, Property PLOT C-26B, KUDIDDIFAWA WESTERN BY PASS, KUMBOTSO. At the bottom of the OP RECORD section, there are two buttons: 'OP' and 'Transfer of Title'.

Figure 18: 2 OPs 1 File

Scenario 3: Normal Transfer

Mapping: 1 OP → 1 ToT

Transfer of Titles: Standard one-to-one transfer

Use Case:

Direct transfer of ownership from original holder to new owner (most common scenario).

FEFR

Select source file number, detect OP record in PRA, then continue with New or Existing flow.

2.4 Transfer of Title Scenarios

The Transfer of Title (ToT) workflow is a critical component of the OSS (One Stop Shop) module, specifically managed through the **Fetch Existing File Record (FEFR)** interface. This workflow handles the change of ownership for properties rooted in Occupancy Permits.

To ensure accurate file lineage and unbroken ownership records, the KLAES system categorizes ToTs into two distinct scenarios:

MLS FILE NO	OP OWNER (CURRENT)	STATUS	RDOF OWNER (STAGED)
☐ RES-WC-1982-567	ALHAJI IBRAHIM UMARU	READY FOR TOT	SOCIETE GENERALE BANK (NIGER...
☐ 1N0-WC-1982-58	MESSRS FEDGO FOAM NIGERIA	READY FOR TOT	UNITY BANK PLC
☐ KH 143	ALHAJI RABIU DAN SISTER	READY FOR TOT	ALHAJI MUHAMMADU GADYAMA
☐ KH 142	ALHAJI ABDULLAHI TALLE	READY FOR TOT	ALHAJI ALFA WALI
☐ RES-WC-1982-85	HABIBU ALIYU	READY FOR TOT	BANK OF CREDIT AND COMMERCE
☐ RES-WC-1982	FALALU YOLA	READY FOR TOT	ALHAJI JA'AFARU SULAIMAN

Figure 21: The ToT Table Overview

Category 1: Default Transfer of Title (Direct Transfer)

- **Description:** This is the standard, direct transfer of ownership from the original OP holder to the current/new holder.
- **System Mapping: 1 OP → 1 ToT**
- **Workflow:**
 1. The original allottee (Party 2 on the OP) initiates a Change of Name/Ownership application.
 2. The OSS FEFR interface links the existing OP to a newly commissioned FileNo.
 3. A single Transfer of Title (ToT) instrument is generated and routed to the Deeds Department for registration.

- **Use Case:** A direct sale or gift where the original government allottee transfers the property directly to the current buyer without any intermediate owners.

Category 2: Sequential/Chain Transfer of Title

- **Description:** This scenario handles complex ownership chains where the property has changed hands multiple times before reaching the current holder. It captures the transfer from the original OP holder to an intermediate holder, and subsequently to the current holder.
- **System Mapping: 1 OP → 2 (or more) ToTs**
- **Workflow:**
 1. The original allottee transfers the OP to an intermediate buyer (Person A), generating the **First ToT**.
 2. Person A subsequently transfers the property to the current buyer (Person B), generating the **Second ToT**.
 3. The OSS FEFR interface captures this chain, linking the single original OP to multiple sequential ToT instruments.
 4. The system generates a comprehensive ownership lineage, ensuring that the current holder's title is backed by a complete, auditable chain of previous transfers.
- **Use Case:** The original holder sells the property to Person A, who later decides to sell it to Person B (the current applicant). KLAES ensures both transfers are legally documented and linked to the root OP to prevent title defects and fraud.

System Integration Note for ICT & OSS Staff: *Both ToT categories are processed via the **OSS FEFR Interface**. The system automatically calculates the required fee assessments, generates the Change of Ownership documents. For Category 2 (Chain Transfers), the system's **Related Files Interface** is utilized to maintain the historical link between the original OP, the intermediate ToTs, and the final FileNo.*

2.5 Post-FEFR Processing Workflow

After successful file commissioning through FEFR, the file is ready for Application Capture and subsequent processing:

2.6 Quality Assurance Checks

Before finalizing FEFR commissioning, the system performs:

1. OP Validation: Confirms OP exists in database
2. Duplicate Check: Prevents double commissioning
3. Encumbrance Check: Flags caveats or mortgages
4. Fee Calculation: Auto-computes transaction fees
5. Workflow Routing: Assigns to appropriate department

2.7 Integration Points

FEFR integrates with:

- Digital Archive: Links to scanned OP documents
- Deeds Module: For instrument registration
- File Tracking: For physical file movement
- Billing System: For fee assessment
- CRM: For applicant communication

3. TRAINING EXERCISES

Exercise 1: OSS File Commissioning

1. Practice single OP capture
2. Process a batch of 5 OPs
3. Review batch job management table
4. Generate information products

Exercise 2: FEFR Scenarios

1. Process an OP Subdivision (1 OP → 2 Files)
2. Complete an OP Merger (2 OPs → 1 File)
3. Execute a Normal Transfer (1 OP → 1 ToT)
4. Document a Chain of Ownership (1 OP → 2 ToTs)

Exercise 3: End-to-End Workflow

1. Commission file through FEFR
2. Capture Change of Name application
3. Upload passport photograph
4. Generate all 6 information products
5. Route to next department

4. TROUBLESHOOTING GUIDE

SN	Issue	Possible Cause	Solution
1	OP not found in database	OP not digitized or typo in entry	Verify OP number, check MDC status
2	Batch validation fails	One or more OPs invalid	Review error log, correct invalid entries
3	Cannot upload photo	File size too large or wrong format	Resize to <2MB, use JPG/PNG format
4	FEFR scenario mismatch	Wrong scenario selected	Review OP details, select correct scenario
5	Land 12 not generating	Missing cadastral data	Complete location details, verify coordinates

5. BEST PRACTICES

1. Always verify OP details before commissioning
2. Use batch mode for processing multiple similar transactions
3. Upload clear passport photos (white background, recent)
4. Double-check scenario selection in FEFR
5. Review all information products before printing
6. Maintain audit trail by saving all generated documents
7. Communicate with applicants via CRM for status updates

Serial No: 00382
