The first quarter of 2026 demonstrated significant progress in the digitization and streamlining of land administration services in Kano State. The KLAES platform successfully processed 2,979 files across Land and OSS channels, with notable improvements in processing efficiency, data integrity, and user accessibility.

The strong performance of the Conversion program (512 files) underscores the Ministry's commitment to regularizing legacy holdings, while the growth in OSS uptake (435 files) validates the demand for streamlined, digital-first service delivery.

Sustained investment in infrastructure, continued stakeholder engagement, and rigorous module testing will be critical to maintaining this momentum and achieving the strategic objectives of the Kano State Land Administration Modernization Initiative.
