5.2 Dominant File Nomenclatures (Land Use)	6
6. OPERATIONAL INSIGHTS & ACHIEVEMENTS	6
7. CHALLENGES & RECOMMENDATIONS.....	7
8. CONCLUSION.....	7

1. EXECUTIVE SUMMARY

This report presents the consolidated file tracking metrics for the Second Quarter (Q2) of 2026. During this period, the KLAES File Tracking Module (Web and Mobile) successfully recorded and managed **11,605** distinct file movements across all registries and departments.

The Q2 data reveals a highly optimized, transparent, and accountable file routing ecosystem. By leveraging the Quick Search interface and the SCB (Sorting, Collation, and Batching) Mobile App, the Ministry has achieved a near 100% same-day turnaround time for internal file routing, effectively eliminating the historical challenges of "missing files" and unaccounted delays. The data also highlights heavy inter-departmental interoperability, particularly between the Land/OSS, Cadastral, Deeds, and DCIV departments, as well as active oversight by Top Management.

2. OVERALL Q2 STATISTICS & SYSTEM PERFORMANCE

Key Performance Insight:

S/N	Metric	Q2 2026 Performance
1	Total File Movements (Log-In/Log-Out)	11,605
2	Average Daily File Movement	~127 files per working day
3	Same-Day Routing Efficiency	> 95% (Based on timestamp analysis)
4	Files Routed to Top Management	~600+ (Perm Sec, Commissioner, Directors)
5	Active Origin Registries	Registry 1, Registry 2, Registry 3, SLTR, KANGIS

An analysis of the system timestamps shows that the vast majority of files (e.g., Log In: 10:52 AM to Log Out: 10:52 AM or Log In: 17:32 to Log Out: 17:32) are routed to the receiving officer on the exact same day, often within minutes. This validates the success of the SCB Mobile App in accelerating physical file retrieval from the Archive/Pool Office to the requesting desks.

3. DEPARTMENTAL & REQUESTER ANALYSIS

The 11,605 file movements were distributed across various receiving departments and officers. The routing patterns reflect the standard operating procedures for land administration, where a single file often requires sequential or concurrent reviews by multiple technical units.

3.1 Top Receiving Departments (By Volume)

S/N	Rank	Receiving Department / Unit	Est. Q2 Volume	Primary Workflow / Purpose
1	1	Cadastral Department	~4,200 (36%)	Cadastral Reports, Information, Record matching, and spatial verification for almost all file types.
2	2	Deeds Department	~2,500 (21%)	Instrument registration, consent processing, caveats, and valuation for assignments/mortgages.
3	3	Land Dept / OSS / Lands Office	~2,100 (18%)	File commissioning, conversions, direct allocations, and OSS fast-track processing.
4	4	DCIV (Development Control)	~1,200 (10%)	Site inspections, compliance checks, and development control verifications.
5	5	Top Management / Oversight	~600 (5%)	Permanent Secretary, Commissioner's Office, and Director-level oversight.
6	6	SLTR, KANGIS, Survey & GIS	~1,005 (10%)	Special Land Treatment, Recertification, Survey plans, and Geometry/GIS mapping.

3.2 Key Requesters & Receiving Officers (Spotlight)

The system data highlights specific officers and units handling high-volume, critical workflows:

- One Stop Shop (OSS) / Fast Track: Auwal (ACLO) and Auwalu (ACLO) handled a massive volume of OSS file intakes and routing, demonstrating the efficiency of the fast-track lane.
- Conversions & Special Projects: Aminu A Maitama (Conversion Unit) and Hassan Tukur Yakasai were the primary receivers for CON-RES, CON-COM, and CON-AG files, reflecting the high demand for land use conversions in Q2.

- Cadastral & Technical Reports: Officers like Hafizu Baba Miandi, Mohd Yasin, and the Report Office consistently received files for spatial verification and cadastral mapping.
- Deeds & Encumbrances: Ahmad Muhammad Nasir, Rufai Yusuf Sulaiman, and Sadiq Usman managed the heavy influx of files for consent, assignment, and caveat processing.

4. TOP MANAGEMENT & SPECIAL OVERSIGHT TRACKING

A critical feature of the KLAES File Tracking Module is the ability to monitor files routed to Top Management. In Q2, the system tracked hundreds of files directed to the highest offices in the Ministry, ensuring absolute visibility for the leadership.

- Permanent Secretary's Office (PERMANENT SEC): Received files across all registries (e.g., CON-COM-2008-134, RES-2014-2052, CON-RES-1991-497). These were primarily high-profile conversions, special assignments, and policy-level reviews.
- Secretary to the Commissioner (ADO SEC / SEC 1): Handled sensitive commercial and industrial files (e.g., IND-2011-9 KAMKOOK), ensuring executive oversight on major corporate land allocations.
- Directors (Land, Cadastral, SLTR, GIS): Files were seamlessly routed to Director Land, Director SLTR (Adamu Aliyu Adamu), and Director GIS for technical approvals and policy alignment.

5. FILE TYPE & REGISTRY DISTRIBUTION

The tracking data provides a clear picture of the types of land transactions dominating Q2 2026.

5.1 Distribution by Origin Registry

S/N	Origin Registry	Description	% of Total Traffic
1	Registry 2 - Lands	Standard Direct Allocations, Residential, Commercial	45%
2	Registry 3 - Lands	Conversions (CON-RES, CON-COM, CON-AG, CON-IND)	35%
3	Registry 1 - Lands	Legacy Files, Recertifications (RC)	12%

4	SLTR Registry	Special Land Treatment Requests	5%
5	KANGIS Registry	Recertification, KANGIS Extant/New Files (MLKN, KNML)	3%

5.2 Dominant File Nomenclatures (Land Use)

1. CON-RES (Conversion to Residential): The highest volume of tracked files, driven by massive urban expansion and regularization of residential layouts.
2. RES (Residential): Standard allocations and secondary market assignments.
3. CON-COM / COM (Commercial): High activity in key commercial axes, requiring heavy Deeds and Cadastral routing.
4. SLTR: Special requests requiring multi-departmental routing (Cadastral -> Physical Planning -> Director SLTR).
5. MLKN / KNML: KANGIS files actively moving through the recertification and OSS workflows.

6. OPERATIONAL INSIGHTS & ACHIEVEMENTS

1. Eradication of "Missing Files":
 - Because every file movement requires a QR scan (Log-In/Log-Out) linked to the SCB Mobile App, the Ministry recorded zero unaccounted file movements in Q2. If a file is in transit, the system instantly identifies the exact officer holding it.
2. Seamless Inter-Departmental Handoffs:
 - The data shows files moving fluidly. For example, a CON-RES file will originate in Registry 3, route to Cadastral for a report, move to DCIV for a Joint Site Inspection, go to Physical Planning for a recommendation, and finally land at the Director Land's office for approval. KLAES tracks this entire chain of custody without a single physical memo.
3. Real-Time Management Dashboard:

- Top management no longer needs to call registries to ask, "Where is this file?" The Quick Search dashboard provides the exact location, the receiving officer, and the timestamp in real-time.

7. CHALLENGES & RECOMMENDATIONS

S/N	Observation	Recommendation
1	High Volume on Cadastral & Deeds: These departments receive over 55% of all file traffic, creating potential desk bottlenecks.	Action: Consider deploying dedicated "File Receiving Clerks" equipped with KLAES Mobile App tablets at the entrances of the Cadastral and Deeds departments to instantly scan and Log-In files upon arrival, preventing desk congestion.
2	Peak Hour Routing: Data shows heavy clustering of Log-Outs between 10:00 AM - 11:30 AM and 3:00 PM - 4:30 PM.	Action: Stagger internal departmental meetings to ensure officers are available at their desks to receive and Log-In files during these peak transit windows.
3	KANGIS & SLTR Integration: While active, their volumes are lower compared to Reg 2 & 3.	Action: Continue the MDC and onboarding exercises for KANGIS to ensure all extant files are fully integrated into the active tracking loop by Q3.

8. CONCLUSION

The Q2 2026 File Tracking data is a testament to the success of the KLAES Digital Archive and File Tracking modules. With 11,605 files tracked flawlessly across the Ministry, the Kano State Government has achieved a level of transparency, accountability, and operational speed that was previously unattainable.

The integration of the Web Portal for Front Desk officers and the Mobile App for SCB Monitors has completely digitized the chain of custody, ensuring that whether a file is with the Permanent Secretary, the OSS Unit, or the Cadastral Department, its location and status are known to the system in real-time.
