Honorable Commissioner,
Ministry of Lands & Physical Planning
Kano State

Through:
The Director, ICT

Dear Sir,

Urgent Need to Design and Set Up a Dedicated Local Area Network (LAN) for the KLAES Server Infrastructure

We respectfully draw the attention of the Honorable Commissioner to the urgent need to design and deploy a dedicated Local Area Network (LAN) for the KLAES Server Infrastructure, with provision for secure wireless transmission of LAN connectivity to client machines across relevant units/departments. The existing network setup was not designed or optimized to support the level of system-wide connectivity, data traffic and real-time access required by KLAES and this limitation has resulted in frequent network downtimes. These disruptions are now significantly affecting the ongoing Data Mining Exercise, causing delays, workflow interruptions and reduced productivity. The deployment of a purpose-built and dedicated LAN infrastructure will ensure system stability, improve performance and safeguard the Ministry's investment in its digital transformation initiatives. We therefore kindly request prompt consideration and approval to address this critical infrastructure requirement.

Please accept the assurances of our highest esteem.

Yours faithfully,

Babatomiwa David Ajayi
Project Coordinator
KLAES Project
